
Effect Locus Mouse Differential Excretion Isomers

original article tissue-specific differential dna ... - tissue-specific differential dna methylation at igf2/h19 locus in a mouse model for embryonal ethanol exposure jizi zhou 1*, yanyan qian 2,3*, qiongjie zhou 1, yu xiong, huijun wang 3, duan ma 2,3,4, xiaotian li 1,4,5 **epigenetic inheritance at the agouti locus in the mouse** - epigenetic inheritance at the agouti locus in the mouse ... strate here that this maternal epigenetic effect is not the result of ... of the mouse4. **characterization of a recombinant mouse t haplotype that ...** - characterization of a recombinant mouse t haplotype that expresses a dominant lethal maternal effect helnz winking**1 and lee m. silvert.1 ... these data indicate that the maternal effect is a consequence of a locus situated between the centromere and t or between qk and tufted (tf). **differential expression of a new dominant agouti allele (a ...** - the differential expressivity of the a ~apy allele is correlated with the methylation status of the inserted iap 5' ltr. these data further support the hypothesis that in dominant yellow mutations at the agouti locus, it is **effect of a coat color locus on kidney lysosomal ...** - effect of a coat color locus on kidney lysosomal glycosidases in the house mouse eva m. hfikansson 1 and lars-g. lundin i ... there is also a differential response to dihydrotestosterone in ... effect of the buff locus on three glycosidase activities. it is not surprising that **effect of 9p21.3 coronary artery disease locus neighboring ...** - the locus with strongest association to coronary artery disease and myocardial infarction in multiple independent large-scale genome-wide association studies. 1-3 the locus is ... role in a mouse model.8 editorial see p 1815 clinical perspective on p 1906 **differential effect of human and mouse Å2-microglobulin ...** - the differential effect of the association with mouse /!-// on the antigenic profile of hla-a25 and-b8 antigens may reflect the different characteristics of the amino acids at residue 12, which interact with residue 33 of />r/i. the latter residue is the only one to differ between human and mouse Å2-/iin the stretch of amino **differential regulation of gene expression in** - differential regulation of gene expression in mouse spermatogonial cells after blocking c-kit-scf interaction with ... the gene product of the w locus is a receptor tyrosine kinase that regulates the survival, growth and ... cognate rna and its effect on mouse sgc function in vitro. using this approach, we demonstrated blocking of ... **nucleicacidsresearch - researchgate | share and discover ...** - nucleicacidsresearch we have shown that the murine type 1 interferon locus is localized on mouse chromosome 4 and in our initial study on the molecular characterization of this locus, we isolated a **kim, effect of 9p21.3 genes on atherosclerosis juyong ...** - the effect of 9p21.3 coronary artery disease locus neighboring genes on atherosclerosis in mice: ... correlations of the 9p21 locus snp genotype to differential expression of the neighboring ... was inserted between exon 3 and 4 of the mouse mtap locus. these mice were maintained on a cba/ca background. mice that are homozygous for the **inhibition by interferon of delayed-type hypersensitivity ...** - decreased responsiveness was influenced by the if-i locus, since in the if-] congenic strain ndv was without effect, as opposed to their-i" strain, in which it provoked a significant **genomic structure of the mouse aâ type lamin gene locus ...** - mouse b3 is coded in the same genomic locus as the b2 gene and expressed by differential splicing and alternative polyad- enylation [10]. a and c are coded in a single genomic locus and thought to be expressed by differential processing of a primary transcript which is most probably transcribed from a single **is the h-2k locus of the mouse stronger than the h-2d locus?** - tive effect between the third locus and ... plain not only differential behavior of the h-2i and h-2d loci in experi- ... age group of the mouse is proximal to the h-2d locus and distal to the h-2k locus. recent evidence shows, however, that the **differential mrna stabilities affect mrna levels in mutant ...** - mouse myeloma deletion mutants have been studied as a model for human heavy 69 chain disease, primarily because the parent mouse cells are available for comparison with the mutants. heavy chain disease (hcd) is a class of lymphoproliferative disorders charac- terized by the production of variant ig **one- and two-locus population models with differential ...** - existing major-locus effect models of parental selection are single-locus, two-allele, and mostly concern uniparental (maternal) ... the highest estimated number of mouse genes expressed in the male gametes is currently 2375 (josephandkirkpatrick2004),andonemightexpect ... equivalent to the assumption of differential viability ...
